

“Khrimian Franz Kiel”
Limited Liability Company
(“KFK”, LLC)

Quality, technical safety and ecology POLICY

The main task of the team of “KFK”, LLC is output of the production fully meeting the requirements of Customers and conforming to legislative and regulating requirements.

Only solving this problem will allow us to maintain fruitful cooperation with our regular Customers and attract new business partners, both Russian and foreign. Each employee should act that way so as Customers will get back to us with new orders, firmly convinced that our production will not only meet all their requirements, but also exceed their expectations.

Improvement of the economic prosperity of “KFK”, LLC and each employee in the first place depends on competitive level of produced products. Customers expect from us beautiful, comfortable and safe products produced in the planned time and with a reasonable price.

To achieve this goal top management of “KFK”, LLC shall ensure:

- compliance of Integrated Management System with international standards – ISO/TS 22163, ISO 9001, ISO 14001 and continuous improvement of its effectiveness;
- compliance of Integrated Management System with legislative and other requirements for products, including the field of technical safety and ecology;
- implementation of actions aimed at preventing product failures;
- decrease of Customers risks when we fulfill the terms of contracts;
- efficient use of all resources in the production process;
- prevention of the pollution of the environment through continuous control and reduction (or maintaining the existing level) of the impact of such environmental aspects as emissions of pollutants into the atmosphere, formation and disposal of hazardous industrial waste.

I take full responsibility for the realization of the present Quality, technical safety and ecology policy of “KFK”, LLC.

Director General

Andrey Popkov
